PROFESSIONAL SUMMARY

Third-Year Computer Science student specializing in Full-Stack Web Development and Systems Engineering. Proven track record of architecting high-availability platforms, designing robust containerized delivery pipelines (Docker, CI/CD), and optimizing low-level Linux/Wayland environments. Adept at building scalable APIs and highly responsive frontend interfaces.

EDUCATION

Vellore Institute of Technology (VIT), Vellore — B.Tech in CSE (CGPA: 8.64) 2023 – Present

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, C, Java, SQL, Shell/Bash

Frameworks & Tools: React, Next.js, TanStack, Django, FastAPI, Docker, Git, Cloudflare, Vercel, Wayland, Qt/QML

Domains: Full-Stack Web Development, CI/CD Pipelines, Linux Systems Administration, API Design, Database Management

EXPERIENCE

- **Web Development Intern — Terionix:** Architected a full-stack platform featuring a Django backend and dual client/admin frontends utilizing TanStack. Containerized the entire architecture via Docker and established an automated CI/CD pipeline deploying directly to a custom-provisioned mobile staging server for end-to-end testing. May 2026 – Present
 - **Technical Head — SEDS VIT:** Architected and deployed production event portals (Hermes and Erebus); managed **270+ concurrent registrations** while maintaining **100% uptime** via Vercel and Cloudflare DNS management. 2026
 - **Research Intern — PRL:** Optimized Python codebase for SHARAD radar visualization; drastically reduced rendering latency for **3 GB of visual data** from several hours down to **sub-10 seconds**. 2025
 - **Web Volunteer — Outreach:** Redesigned web infrastructure for two NGOs using HTML/CSS/JS; improved web accessibility standards and dedicated **100+ hours** to community tech initiatives. 2021 – 2023
-

SOFTWARE & SYSTEMS PROJECTS

- **HyprQuickPaper:** Custom Wayland display protocol wallpaper manager. Deeply optimized system resource allocation to achieve sub-200ms visual switching with 0% idle CPU utilization. *Tech: Quickshell, Wayland, Shell, Linux* 🌐
- **Hermes & Erebus Portals:** High-availability registration and user-management systems built for SEDS VIT events. Handled secure user data routing and integrated strict DNS management. *Tech: React, Next.js, Vercel, Cloudflare DNS* 🌐
- **Vessel:** Local-first desktop application and configurable workspace for document management. Engineered the UI utilizing Qt/QML and implemented robust local metadata storage via SQLite. *Tech: Python, Qt/QML, SQLite, Desktop Architecture* 🌐
- **HyprTodo:** Lightweight desktop task management system utilizing raw shell scripts for background task execution and Quickshell for the frontend user interface. *Tech: Shell Scripting, Quickshell, Wayland, Linux* 🌐
- **OriginShift:** Mathematical application designed to generate randomized yet guaranteed-solvable mazes, demonstrating strong knowledge of search algorithms and dynamic data structures. *Tech: Python, Algorithms, Data Structures* 🌐

- **HackBattle (Tracker):** Interactive web application utilizing the Webcam API and JavaScript to track physical hand and eye movement for mouse pointer navigation in the browser. *Tech: JavaScript, Web APIs, Frontend Logic* 🌐
 - **DSW (Room Booking):** Relational database management system featuring a web interface for handling university room bookings, scheduling logic, and conflict resolution. *Tech: Web Development, Database Management, HTML/CSS* 🗄️
-

AWARDS & ACHIEVEMENTS

- **1st Place — Caterpillar Hackathon (2024):** Developed a technician-facing mobile application.
 - **Track Prize — Yantra Central Hackathon (2025):** Built a performant genomic analysis platform.
 - **1st Place — Prima Vera Filmmaking (2023) — National Qualifier — First Lego League (2019)**
-

CERTIFICATIONS & INTERESTS

Certifications: DELF B1 (French), Udemy Python Programming (64.5 hours)

Languages: English (Professional), French (Conversational), Hindi, Bengali

Interests: Linux System Administration (Arch), Web Architecture, Theatre
